

# Countdown 2010 – Biodiversity

## Photo Championship 2010 organised by Naturefriends International

FIAP-Patronage: 2010/045; VÖAV-Patronage: 28-32/2010;  
IIFW-Patronage: 2010/25

**Dear naturefriends and friends of photography,**

**the term biodiversity describes the variety of life forms, from individual genes to animals, plants and complex ecosystems and ecological processes. It accounts for the uniqueness of our planet and provides the basis for our existence.**

**Naturefriends International (NFI) and its member organisations actively champion the conservation of biodiversity and intact ecosystems as a basic prerequisite for sustainable development. Naturefriends' efforts to offer people a genuine experience of biological diversity constitute a contribution to 'Countdown 2010'. This international initiative is based upon the UN Convention of Biological Diversity and seeks to markedly reduce the biodiversity loss by 2010 – the International Year of Biodiversity. The 2010 Biodiversity Target was not reached but the thousands of actions taken by Countdown 2010 partners are important steps to improve the status of biodiversity and to increase public awareness.**

**The NFI Photo Championship combined the Naturefriends' commitment to nature conservation and environmental protection (which is displayed in many projects: the Friends-of-Nature Houses, the Natura Trails and the Landscape of the Year as well as the Alpine Pearls) with the conservation of biodiversity. It contributed to raising the awareness of the diversity of nature by motivating hundreds of photographers worldwide to participate in this competition.**

**We would like to thank our co-organiser Naturefriends Austria, our cooperation partners Austrian Federal Forests and Alpine Pearls for their collaboration, and our generous sponsors as well as the members of the jury for their support and professional expertise. Special thanks go to all the photographers who, with their contributions, illustrated the broad spectrum of the diversity of life and the nature we all adore. Because the awareness about species and habitats is an essential prerequisite for their protection!**

**Manfred Pils  
Naturefriends International  
President**

**Christian Baumgartner  
Naturefriends International  
Secretary General**

## General category

### Biodiversity

Biodiversity is the variety of life, from individual genes via animals and plants to complex ecosystems and ecological processes. It accounts for the uniqueness of our planet while providing the basis for our existence. To this day, approximately 1.75 million species of plants, animals and microorganisms have been discovered, but the estimated number of undiscovered species is many times this figure (13 million).

#### Theme 1

### Biodiversity in the surroundings of Naturefriends houses

In the course of more than one hundred years, Naturefriends have built over 1000 houses. Naturefriends houses are vibrant meeting points that give pride of place to the well-being of their guests. The sustainable use of resources and respect for the natural environment are essential elements of the organisation's overall goals. The staffs at Naturefriends houses seek to familiarise visitors with the region's nature and culture and to inform them about interesting excursions.  
[www.friendsofnaturehouses.net](http://www.friendsofnaturehouses.net)

#### Theme 2

### Biodiversity along Natura Trails

Natura Trails © are theme trails in protected areas well suited for soft leisure pursuits. The trails are designed to introduce people to the domestic flora, fauna and habitats, thus enhancing their awareness of the need to protect nature and landscapes. The European Natura Trail Network covers more than 60 Natura Trails in Germany, Austria, Czechia, Romania and Slovakia.  
[www.naturatrails.net](http://www.naturatrails.net)

#### Theme 3

### Biodiversity in Landscapes of the Year

Since 1989, Naturefriends have regularly designated European cross border regions of high ecological value as Landscapes of the Year, for periods between two and three years. The principal objective pursued with every Landscape-of-the-Year project is to encourage the sustainable development of the region selected by providing professional advisory services in the fields of tourism, regional development and media as well as PR activities and by running specific pilot projects. So far, twelve Landscapes of the Year have been designated in Europe.

## Theme 4 Biodiversity in the Alpine Pearls

Since 2006, 20 places of particular scenic beauty in the Alpine countries of France, Switzerland, Italy, Germany, Austria, and Slovenia have been cooperating in the field of soft mobility under the catchphrase of “Alpine Pearls”. Since 2009, the Alpine Pearls have cooperated with Naturefriends International under the motto: “Soft mobility – a new feel-good holiday factor” (“Neuer Urlaubsgenuss durch sanfte Mobilität”), with the objective of boosting sustainable tourism in the Alpine region.
